

Gretel Rajamoney

Project: Client-Server Chat

How to Run My Program:

python server.py

python client.py

Server Screenshot:

```
C:\Users\Gretel Rajamoney\Desktop>python server.py
server listening on the host: localhost
server listening on the port: 1212
connection from: ('127.0.0.1', 60288)
type /q to quit the program
waiting for a message from the client...
hello
>how are you ?
good, you ?
>good :)
bye
>bye

C:\Users\Gretel Rajamoney\Desktop>
```

Client Screenshot:

```
C:\Users\Gretel Rajamoney\Desktop>python client.py
connected to the host: localhost
connected to the port: 1212
type /q to quit the program
pls enter a message to send to the server
>hello
how are you ?
>good, you ?
good :)
>bye
bye
>/q
